Signal Loop – Sanity Checklist

User Setup

- ■ At least 50 seeded users exist
- ■ Two user types are clearly defined
- ■ Profiles can be viewed

Matching

- ■ Matching logic produces results
- ■ Matches are visible to consumers
- ■ Match status is stored correctly

User Experience

- ■ Consumers can view recommended matches
- ■ Consumers can favourite or bookmark users
- ■ Map view renders correctly

Admin View

- ■ Admin can view all users
- ■ Admin can filter by user type
- ■ Admin can filter by match status
- ■ Admin can view individual user matches

Final Check

- ■ Application loads cleanly from fresh session
- ■ Demo works without manual fixes
- ■ Core vertical is complete

Critical Non-Negotiables

- ■ Application is deployed and accessible via URL
- ■ User data persists (no reset on refresh)
- ■ Matching logic produces visible results
