Atlas Systems – Sanity Checklist

Core Structure

- ■ At least two clients exist
- ■ Clients cannot access each other's data
- ■ Role-based views function correctly

Internal Admin

- ■ Admin can view all clients
- ■ Admin can filter or switch client context
- ■ Admin can create or manage a client
- ■ Admin can update client branding
- ■ Branding updates reflect in client view

Client View

- ■ Client dashboard loads correctly
- ■ Client sees only their own data
- ■ Navigation works without errors

Final Check

- ■ Core flows work end-to-end
- ■ No demo-only shortcuts
- ■ Clear explanation of scope decisions

Critical Non-Negotiables

- ■ Uses a real database (no mock-only storage)
- ■ Multi-tenant data isolation is enforced
- ■ Role-based access is implemented and working
- ■ Tenant theme customisation from back office is functional
