Mainframe – Sanity Checklist

Test Coverage

- ■ Critical user journey is automated (login → core action → outcome)
- ■ At least one admin flow is tested
- ■ At least one data write operation is tested

Automation & Execution

- ■ Tests run via a single command or trigger
- ■ No manual steps required to execute tests
- ■ Tests can be run repeatedly with consistent results

Reporting & Visibility

- ■ Clear pass/fail output is generated
- ■ Failure clearly identifies what broke
- ■ Results can be understood by a non-developer

Final Check

- ■ Tests can be executed live during demo
- ■ At least one failure case can be demonstrated
- ■ System meaningfully validates real behaviour

Critical Non-Negotiables

- ■ Automated regression runs without manual intervention
- ■ Core user flow is covered by automated test
- ■ Clear, visible pass/fail output is produced
- ■ Test suite detects at least one meaningful failure scenario
